

Clinical Services Division

NeoGenomics is the leading oncology reference lab for oncologists, pathologists, and hospitals with a longstanding reputation for service and quality in the community oncology market.

We work with more than 4,400 hospitals, institutions, and oncology offices, primarily located in community settings, to help ensure all patients can receive access to high-quality diagnostic tests.

We possess the industry's most comprehensive test menu in oncology, including the most comprehensive combination of multi-method tumor profiles and targeted biomarker tests in the industry.

Key Offerings and Services

Next Generation Sequencing (NGS) Program: We offer a broad and deep offering of NGS-based testing across hematologic cancers and solid tumors. Our offerings include multiple modalities, including targeted profiles, broad-based profiles and liquid biopsy tests, allowing us to match the right test with the right patient.

Mobile Phlebotomy Program: We have established a national mobile phlebotomy program which provides patients with access to in-home blood draws for multiple tests, including InVisionFirst®-Lung and the NeoLAB® Solid Tumor Liquid Biopsy.

The program helps ensure that care is delivered in a timely, accessible manner, with all costs covered by the company.

Sponsored Testing Program: Our Sponsored Testing Program allows providers and patients access to no cost testing that may provide them early access to emerging therapies.

Quick Facts

- Performs over 50,000 NGS tests each year
- #1 lab in the U.S. for breast cancer testing*
- #1 lab in PD-L1 testing (based on number of tests performed)**

* Data from CMS claims database

** Internal data based on test utilization
