

NeoGenomics Company Overview

NeoGenomics is a premier cancer diagnostics and pharma services company serving oncologists, pathologists, pharmaceutical companies, academic centers, and others with innovative diagnostic, prognostic, and predictive testing.

We are made up of an international team of experts in developing and delivering laboratory diagnostic and clinical trial services with a focus in cancer.

We work to solve the medical, scientific, and logistical challenges of making precise diagnoses, aiding in bringing new therapies to market and finding the unique hallmarks of each patient's disease that point the way to proper treatment.

Our core and synergistic offerings

Clinical Services

We are a leading oncology reference lab for oncologists, pathologists, and hospitals. We offer one of the most comprehensive oncology-focused testing menus in the world for physicians to help them diagnose and treat cancer.

Pharma Services

We are a leading provider of oncology-focused research and clinical trial services focusing on biomarker assays. We provide comprehensive support from pre-clinical and research discovery through FDA filing, approval, and launch.

Informatics

We leverage our clinical testing data to address real-world problems for patients and other stakeholders. Our information platform includes one of the largest cancer testing databases, covering the complete spectrum of oncology testing modalities for over 1.6 million patients and growing.

Inivata

A liquid biopsy focused division, Inivata is a global commercial stage company acquired by NeoGenomics in 2021. We are now leveraging Inivata's world-class technology platform to become a leader in the minimal residual disease (MRD) testing market.

Commitment to Patients

NeoGenomics has been serving the cancer community for over 18 years and is committed to improving patient care through innovative cancer testing for every cancer patient. Each of our employees is dedicated to fulfilling our mission to save lives by improving patient care.
