Utilization

Medicare does not expect to see labs routinely perform more than 24 markers per specimen.

Comprehensive marker panels used to indiscriminately "screen" specimens, regardless of the submitted suspected diagnosis, are not considered reasonable and necessary.

An FCM performed more than every 3 months to monitor stable HIV infection is not considered reasonable or necessary. More frequent studies may be indicated if a patient develops drug resistance and needs to be treated with another antiviral(s).

DNA analysis for selected patients with carcinomas may be appropriate ONLY once after diagnosis and before treatment is initiated.

Noridian expects the initial flow evaluation to contain a greater number of antibody determinations than a subsequent follow-up study. MDS and CMPD are general exceptions because these disorders are at risk for developing leukemia. Progression to leukemia may necessitate cytoplasmic markers.

Noridian Local Coverage Determination (LCD): Flow Cytometry (L34215)

Limitations

Since FCM immunophenotypes for most common lymphomas and leukemias are well characterized, Noridian does NOT consider it "reasonable and necessary" to perform more than 24 markers in a panel. When atypical or unusual FCM results are obtained, the selective addition of more markers may be indicated.

The flow report must document the specific indication for each marker over the 24 marker limit.

The FCM report must document the specific indication for **each** marker over the 24-marker limit. **FCM reports without clear** justification for each marker over 24 will be denied.

Disclaimers

This resource is intended to aid physicians and qualified office staff to identify diagnosis codes (ICD-10 codes) that support medical necessity and is not intended as a substitute for independent medical decision making..

The ICD-10 codes indicated in this guide are based on AMA guidelines and are common codes currently listed as medically supportive, and therefore covered, under Medicare's limited coverage policy.

Services must meet specific medical necessity requirements contained in any applicable statutes, regulations and manuals, as well as criteria defined by National Coverage Determinations (NCDs) and Local Coverage Determinations (LCDs). For every service billed, you must indicate the specific sign, symptom, or patient complaint that makes the service reasonable and necessary.

The accuracy and relevance of this information should be verified by reference to the current version of the Coding Manual of the American Medical Association (AMA) and by visiting the Centers for Medicare and Medicaid Services (CMS) Web site at www.cms. hhs.gov/home/medicare.asp. This information is not intended to suggest reimbursement or provide direction for coding and was obtained online at www.cms.hhs.gov/home/medicare.asp. Codes listed are effective as of February 1, 2019. To ensure the accurate and appropriate use of the information, it is recommended that the primary sources (i.e. CMS, MAC publications, notices, and advice) should be consulted periodically since information is often affected by ongoing developments.

All CPT codes provided above are based on AMA guidelines and are for informational purposes only. CPT coding is the sole responsibility of the billing party. Please direct any questions regarding coding to the payer being billed.
