## Consultation

**COMPASS™** Comprehensive evaluation including morphology

Blood and/or Bone Marrow  
 Paraffin block for Morphology to follow

**COMPASS Select:** (Without morphology)

Blood and/or Bone Marrow  
 - Morphology performed by client  
 (Morphology report required. Please fax to avoid testing delays.)

A NeoGenomics pathologist will select medically necessary tests (with any exceptions noted or marked by the client) to provide comprehensive analysis and professional interpretation for the materials submitted.

**Please attach CBC for Blood and Bone Marrow (required)**

Do not add NGS Profile without prior approval

### Lymphoma Consult

Lymph Node/Tissue for Lymphoma\*

**Specimen Hold Option:**  Refrigerate and Hold

**Tech-Only Opt Out Option:** To avoid delay in patient care and as medically necessary for an individual patient, additional markers will be added by the flow lab when abnormal populations are detected. Please refer to NeoGenomics Flow Cytometry Guidelines for additional information on tech-only add-on medical necessity criteria. Tech-only clients may instruct NeoGenomics to not follow this stated criteria by checking this box.

### WRITE-IN

Any testing ordered in the Write-In section will be sent to a reference laboratory that has NY licensure to perform requested testing. NeoGenomics will facilitate logistics on behalf of the client. NeoGenomics testing will be prioritized.

## Specimen Requirements

Refrigerate specimen if not shipping immediately and use cool pack during transport. Please call Client Services Team with any questions regarding specimen requirements or shipping instructions at 866.776.5907 option 3. Please refer to the website for specific details on each specimen.

## Additional Billing Information

Any organization referring specimens for testing services pursuant to this Requisition Form ("Client") expressly agrees to the following terms and conditions.

- 1. Binding Service Order.** This Requisition Form is a legally binding order for the services ordered hereunder ("Services") and Client agrees that it is financially responsible for all tests billable to Client hereunder.
- 2. Third Party Billing by NeoGenomics and Right to Bill Client.** Client agrees to accurately indicate on the front of the Requisition Form that either Client should be billed (e.g., Client receives reimbursement pursuant to a non-fee-for-service basis, including, but not limited to, a capitated, diagnostic related group ("DRG"), per diem, all-inclusive, or other such bundled or consolidated billing arrangement) or NeoGenomics should bill the applicable federal, state or commercial health insurer or other third party payer (collectively, "Payers") for all Services ordered pursuant to this Requisition Form. For all such Services billable to Payers, Client agrees to provide all billing information necessary for NeoGenomics to bill such payer. In the event NeoGenomics: (i) does not receive the billing information required for it to bill any Payers within ten days of the date that any Services are reported by NeoGenomics; (ii) the Services were performed for patients who have no Payer coverage arrangements; or (iii) the Payer identified by Client denies financial responsibility for the Services and indicates that Client is financially responsible, NeoGenomics shall have the right to bill such Services to Client.

## Additional Specimen Information

If submitting multiple blocks, clients must indicate either "Choose best block (global molecular/NGS testing only)", or assign the selection of blocks to individual tests. If multiple blocks are sent to without a selection, they will be held until clarification is provided. Please call Client Services Team with any questions regarding specimen information.

## Specimen Hold Option Descriptions

To preserve the integrity of samples and avoid unnecessary testing, NeoGenomics Laboratories offers the option of processing samples to maintain specimen integrity for extended periods, without a test order. Any hold order will result in billed charges to the ordering client if testing is not ordered/performed. Specimen Hold Options include:

**FISH: Direct Harvest and Hold:** FISH specimens will be minimally processed and directly harvested while the cells are still viable. Analysis is not performed until the client test order is received. Processed samples will be retained for 28 days.

**Flow Cytometry: Refrigerate and Hold:** Flow cytometry samples will be refrigerated and retained for 28 days, however, optimal stability is within 72 hours of draw.

**Molecular Testing: Freeze and Hold:** Molecular samples will be isolated, preserved using a freezing mix, and stored in a freezer. **Use this option when it is uncertain which test(s) may be added.** Analysis is not performed until the client test order is received. Processed samples will be retained for 28 days.

**Extract Nucleic Acid and Hold:** Nucleic acid (DNA or RNA) will be isolated from viable cells and stored in a freezer. **Use this option when it is known which test(s) may be added and make note of which possible tests on test requisition.** Analysis is not performed until the client test order is received. Processed samples will be retained for 28 days.

## Test Descriptions

Please see complete test descriptions and all available tests at our website, [www.neogenomics.com](http://www.neogenomics.com).

## Test Notations

### Specimen Usage

NeoGenomics makes every effort to preserve and not exhaust tissue, but in small and thin specimens, there is a possibility of exhausting the specimen in order to ensure adequate material and reliable results.

### FlexREPORT™

FlexREPORT can be ordered on any global or tech-only testing referred to NeoGenomics. This report template can be used to import data and images collected from testing performed outside of NeoGenomics, and incorporated into a one page summary report. Client logo and contact information will be in the header of the FlexREPORT.

### FISH

Plasma cell myeloma FISH panels: Plasma cell enrichment will be performed on bone marrow and blood samples having plasma cell FISH. Sample should be received at NeoGenomics Laboratories within 72 hours of collection.
